

Nelson Boralli Neto

Experienced Software Engineer with 7+ years of expertise in developing and maintaining web applications across a wide range of industries. Adept at leading projects from concept to completion, including transitioning legacy systems to modern architectures, optimizing user experiences, and driving data-driven decisions. Passionate about continuously improving product performance and delivering high-quality solutions using Agile methodologies.

EXPERIENCE

Route, Remote — *Software Engineer II*

Apr 2022 - Dec 2024

- Maintained and developed micro frontends as part of a transition to replace the legacy administrative dashboard for merchants.
- Led the planning of a full website rewrite from WordPress to a modern JavaScript framework.
- Designed and implemented an order tracking page, enhancing user experience by providing easy access to order details via email.
- Mentored two junior engineers, fostering their growth and integration into the team.
- Contributed to the development of a component library, streamlining the creation of reusable, style-compliant React components across micro frontends.
- Managed website optimization through A/B testing, driving data-driven improvements to user experience and performance.

RealTask (Third Party to BTG Pactual), Remote — *Software Engineer*

Sept 2021 - Apr 2022

- Develop and maintain 2 web applications using DotNet, MySQL, SQL Server, Vue.Js, Angular.Js and Agile methodologies.
- Write unit tests using XUnit.
- Improve the quality of code in projects currently using Vue.Js.
- Develop and maintain services and integrations that are vital for the operation of the bank, using DotNet and RabbitMQ.
- Ensure the standardization of the code with tools like TSLint.

LeanWork Technology, Remote — *Software Engineer*

May 2019 - Sep 2021

- Maintained a web application in the field of education using DotNet Core and Angular 6+.
- Improved the performance of SQL Server procedures.
- Implemented solutions with Azure Function, integrating them with DotNet Core APIs.

ForLogic Software, Cornélio Procópio — *Web Developer*

Nov 2017 - May 2019

- Built database objects with SQL Server and created database models with EF Core.
- Designed custom APIs with DotNet Core.
- Maintained a web application with Angular 4 and created a new one with Angular 6+.
- Applied Material UI concepts in web pages.
